

Security Cameras

Policy #12

This policy sets out the framework within which the Jefferson County Library District will use security cameras. The Library uses security cameras to enhance library users' safety and security, staff, and property while protecting individuals' right to privacy.

The security camera installation consists of dedicated cameras providing real-time surveillance monitoring. The primary use of security cameras is to discourage inappropriate and illegal behavior and enhance the opportunity to apprehend offenders.

Signs alerting customers to the use of security cameras are posted.
